Chartered. The Measure of Excellence

CPEng | CEngT | CEngA

**Earn CPD
hours**

The Chartered credential is one of Engineers Australia's key offerings and is also an important marker to industry and the community of independent, competent and ethical practice.

Be recognised by your peers as a Chartered Professional Engineer (CPEng), Chartered Engineering Technologist (CEngT) or a Chartered Engineering Associate (CEngA).

Chartered status is your global competitive edge. It gives you a superior market value and instantly signals your ability to exceed expectations with professionalism and respect. Have your questions answered.

De-myth the process... for instance, did you know that you no longer need to write lots of reports?

This information session will discuss:

- Why you should become Chartered
- The six-step application process
- An explanation of the evidence-based approach
- Continuing professional development (CPD) requirements
- How Chartered and the National Engineering Register are pathways to state based registration
- Include an audience Q&A session

You do not have to be a member of Engineers Australia to attend this event. Bring a friend or colleague with you.

**Find out how you can get your Chartered started.
Register your interest today.**
